Welcome to Clinipak

Clinipak is a medical manufacturing and distribution company that provides a distinct range of solutions to support all stages of the decontamination process.

We are one of the only UK-based companies to specialise exclusively in the provision of Central Sterile Supplies and Theatre Sterile Supplies.

For over 30 years, Clinipak has not only been dedicated to supporting the cleaning, disinfection and sterilisation of reusable invasive medical devices, but has maintained a company ethos which focuses on quality, innovation and customer satisfaction.

Our quality management system is not only accredited under the ISO 9001:2008 certification, but enables us to implement more efficient ways of working, improve cost control and develop new techniques to advance current working practices.

As a result of effectively interacting with our customers and understanding their specific needs, we are constantly improving our existing product portfolio and developing innovative, trusted solutions for all central sterile service departments. Our bespoke solutions have been notably designed to overcome common issues such as wet packs, torn sets and handling issues.

Our location in the South East of England and proximity to London provide us with excellent transport links which ensure a high-quality delivery service throughout the UK.

As a unique proposition to our customers, we can provide training, support and clinical guidance to ensure the most cost effective and reliable solutions for individual needs.

Global presence

Clinipak has developed strong relationships on an international scale over the last 5 years and now actively distributes its products to more than 40 countries, particularly across Europe and North America. Please contact our team if you would be interested in becoming a Clinipak distributor.

Industry partnerships

Since its inception in 1983, Clinipak has proudly started to distribute a wide range of worldwide, reputable brands to more effectively exceed the needs of our customers in the UK and overseas. The products of these key suppliers not only complement our product ranges, but support our intentions to provide the most trusted solutions at every step of the decontamination process without fail.

Clinipak is proudly distributing the following brands in the UK:

Cleaning

pages 05-08

Cleaning brushes for cannulae

A range of disposable brushes which have been designed for the manual cleaning of dirty cannulated instruments.

There are various styles and sizes available to provide the most effective cleaning solution.

Flexistem

A unique disposable cleaner for all small cannulae, Clinipak Flexistem has been produced in a wide range of materials and various diameters to provide either soft or hard cleaning properties.

CODE	DESCRIPTION	MATERIAL	QUANTITY
FLEX001	3mm soft cleaner	Cotton	1 x 10m coil
FLEX002	3mm super bristle	Cotton & Nylon	1 x 10m coil
FLEX003	3mm double clean 15cm	Cotton & Nylon	100
FLEX004	9mm fleece stem 30cm	Polyester	50
FLEX005	12mm fleece stem 30cm	Polyester	50
FLEX006	15mm bristle stem per 30cm	Polyester & Nylon	20
FLEX007	15mm bristle stem	Polyester & Nylon	1 x 5m coil
FLEX033	3mm fleece stem 30cm	Polyethylene	50

Wavy flexistem

Wavy flexistem has been developed for cleaning the inside of long instruments and prevents the brush from buckling when a harsher pushing force is required.

CODE	DESCRIPTION	MATERIAL	QUANTITY
FLEX007A	15mm wavy bristle stem	Polyester & Nylon	1 x 5m coil
FLEX007B	15mm wavy bristle stem	Polyester & Nylon	10 x 66.5cm coil

Microclene

Microclene is a solution to facilitate the cleaning of extra small bore items. A development of flexistem, microclene is finer, more brush-like, and can be used to safely dislodge deposits during the washing process.

CODE	DESCRIPTION	MATERIAL	QUANTITY
FLEX021	3mm microclene (super fine)	Polyester & Nylon	1 x 7.5m coil
FLEX022	6mm microclene (medium fine)	Polyester & Nylon	1 x 7.5m coil
FLEX023	3mm microclene (super brush)	Polyester & Nylon	1 x 7.5m coil
FLEX024	6mm microclene (medium brush)	Polyester & Nylon	1 x 7.5m coil

Flexistem and microclene dispensers

Clinipak dispensers ensure that flexistem and microclene are accessible at all times. A cutter is also supplied alongside these dispensers to enable users to cut these brushes to any required length with ease.

FLEXISTEM DISPENSER

CODE	DESCRIPTION
FLEX008	Dispenser for the flexistem range, which includes one cutter and one of each FLEX001 – FLEX007. Size: 285 x 190 x 180mm.
FLEX009	Complete refill pack for flexistem dispenser which contains one of each FLEX001 – FLEX007.

MICROCLENE DISPENSER

CODE	DESCRIPTION
FLEX025	Dispenser for the microclene range which includes one cutter and one of each FLEX021 – FLEX024. Size: 285 x 190 x 180mm.
FLEX026	Complete refill pack for microclene dispenser which contains one of each FLEX021 – FLEX024.

“... We have consistently relied on Clinipak over the last decade for its variety of high-quality products that has helped us to achieve excellence in the delivery of our hospital sterile services.”

Val O'Brien
Global Technical Lead HS, ret.
Synergy Health Plc

Brushes for wash room cleaning

A range of disposable and reusable cleaning brushes for manual cleaning in the wash room.

Blue brushes

W

CE

LF

A range of brushes with strong nylon bristles mounted into durable handles which are long lasting and safe to use. These brushes are suitable for cleaning and disinfection, but not for steam sterilisation.

CODE	DESCRIPTION
BBR001	Medium blue cleaning brush
BBR002	Round blue cleaning brush
BBR003	Small blue cleaning brush

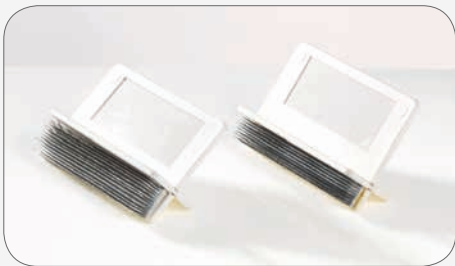

Diathermy cleaning brushes

W

CE

LF

A robust pair of stainless steel brushes for cleaning the tips of diathermy forceps. The removable guard prevents damage to the insulation of instruments and the brush can be separated for safer cleaning.

CODE	DESCRIPTION
DIA001	Supplied as a pair – 1 x 10mm wide and 1 x 15mm wide

Disinfection

pages 09-16

Trays and baskets

A range of high-quality stainless steel washing and instrument baskets produced in line with all industry standard sizes or made to customer requirements.

Clinipak premium baskets

S EO HP W CE LF Custom sizes available

Clinipak premium baskets are produced with high-quality, perforated stainless steel which guarantees both strength and durability at an attractive price. Each basket is resistant to accidental damage, supplied with or without handles, and designed with rounded corners to avoid torn wraps from sharp edges.

CODE	DESCRIPTION	SIZE
BSK316	Din	480 x 250 x 50mm
BSK317	Half Din	250 x 250 x 50mm
BSK318	Double Din	480 x 480 x 50mm
LID316	Lid to fit BSK316	480 x 250mm
LID317	Lid to fit BSK317	250 x 250mm
LID318	Lid to fit BSK318	480 x 480mm

Flat base economy baskets

S EO HP W CE LF

A selection of two baskets with perforated stainless steel sides and a wire mesh base which facilitates effective drainage in the washer disinfector. All baskets are electrolytically polished and are supplied with inner mounted drop handles. Lids are also available to fit these baskets.

CODE	DESCRIPTION	SIZE
CIL-0234	Flat base basket 240	240 x 250 x 60mm
CIL-0237	Flat base basket 480	480 x 250 x 60mm

Wire mesh economy baskets

S EO HP W CE LF

A selection of two baskets made entirely from a 4.2mm woven stainless steel mesh which exhibits strong water drainage properties. The baskets are electrolytically polished and have a stackable rim with a burr-free smooth finish.

CODE	DESCRIPTION	SIZE
CIL0202	Wire mesh basket 240	240 x 250 x 60mm
CIL0210	Wire mesh basket 480	480 x 250 x 60mm

Tray dividers

S EO HP W LF

Clinipak tray dividers are available as a one-piece six compartment divider or adjustable slotted divider bars which can enable users to adjust layouts. A DIN tray would require one DIV480 and two DIV250 to produce 6 compartments. All dividers are made from Stainless steel.

CODE	DESCRIPTION	SIZE
DIV116	A fitted divider with six compartments.	480 x 250 x 38mm
DIV480	Adjustable slotted divider bar to fit trays 480mm long/wide.	480 x 38mm
DIV250	Adjustable slotted divider bar to fit trays 250mm long/wide.	250 x 38mm

Trinket baskets

S EO HP W LF

Small stainless steel baskets to hold fine items such as screws and bolts.

CODE	DESCRIPTION	SIZE
CIL0406	Fine mesh basket	80 x 80 x 34mm
CIL0705	Trinket box	90 x 60 x 25mm
CIL0706	Trinket box	105 x 70 x 25mm
CIL0707	Trinket box	120 x 80 x 25mm
CIL76-0204	Fine mesh basket	105 x 70 x 25mm
CIL76-0186	Trinket box (wire mesh lid)	105 x 70 x 25mm

Nic-nac baskets

S EO HP W CE LF Custom sizes available

A basket selection designed to transport small items through the wash and autoclave process. All nic-nac baskets are produced with a perforated stainless steel sheet with a scalloped hinged lid.

CODE	SIZE
NIC001R	80 dia x 30mm
NIC002	178 x 127 x 25mm
NIC003	178 x 229 x 25mm
NIC003DEEP	180 x 230 x 50mm
NIC004DEEP	180 x 180 x 50mm
NIC005DEEP	105 x 70 x 25mm

Belintra premium baskets

A high quality range of stainless steel trays and baskets with perforated sides and a mesh base to minimise wet packs. Available in three main industry standard sizes.

High-quality Belintra silicone matting can be supplied for each premium basket size.

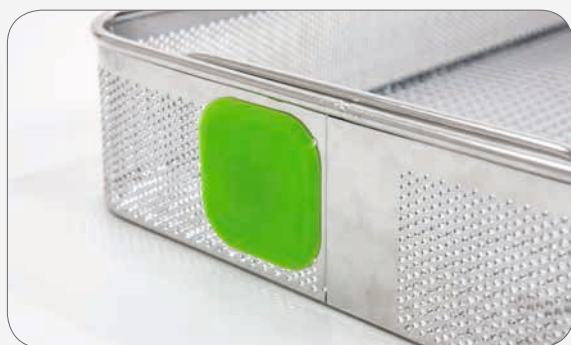

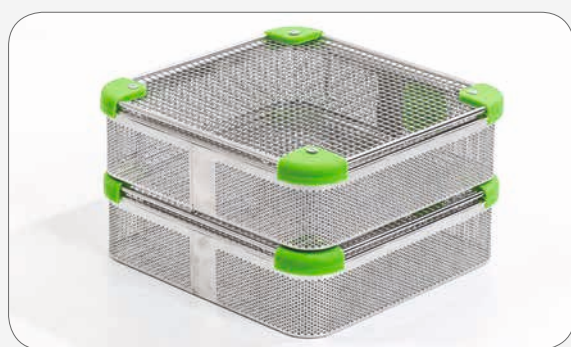

CODE	SIZE
BELBSK116	480 x 250 x 60mm
BELBSK117	240 x 250 x 60mm
BELBSK110	120 x 250 x 60mm

Belintra Steri-ID range

The Belintra steri-ID range represents a high-quality alternative to the traditional process for tracking the contents of instrument baskets with barcode stickers due to the use of embedded tagging. The tag integrated within steri-ID instrument baskets is not only compatible with various suppliers of RFID writing and reading technologies, but can be scanned through sterilisation packaging. The integrated tag is available in two standard sizes (DIN 1/1 and DIN 1/2).

The Steri-ID range is also resistant to all common washing and sterilisation conditions, supplied in 5 different colours to distinguish between distinct surgical sets and can be implemented for over 400 cycles.

CBM Baskets

The CBM basket ranges are manufactured with AISI304 grade stainless steel and can be introduced within sterilisation containers or with sterilisation barrier wrap. These baskets are also resistant to colour changes as a result of electro polishing and exhibit a surface treatment that increases their water drainage capacity.

Additional benefits include a tailored design service which enables baskets or silicone supports to be produced in line with user requirements. Please contact a member of our sales team for further size enquiries.

MINI AND MICRO BASKETS

CODE	DESCRIPTION	SIZE
CBM63J	Mini basket with lid (without handles)	200 x 80 x 35mm

FOR TWO ENDOSCOPES

CODE	SIZE
CIL2730	290 x 80 x 52mm
CIL2729	460 x 80 x 52mm

Aluminium trays

A range of trays which is manufactured with 16swg aluminium sheets with folded edges for extra rigidity and boasts welded or open corners with side holes to ensure tray tags can be easily fixed. Lids are available to fit trays.

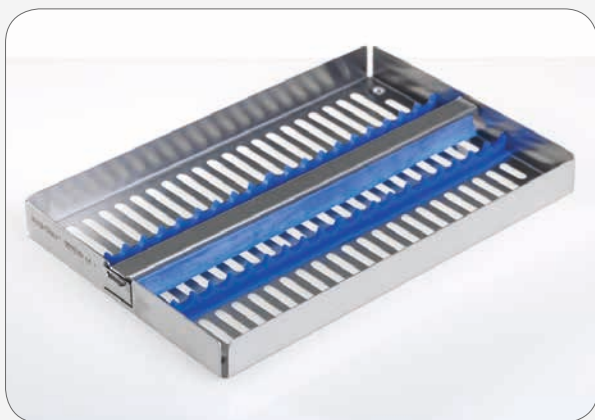

CODE	SIZE
TRY001	305 x 152 x 51mm
TRY002	305 x 305 x 51mm
TRY003	305 x 457 x 51mm
TRY004	305 x 610 x 51mm
TRY005	457 x 457 x 51mm
TRY201	356 x 495 x 51mm (open cornered)

Delicate wash tray baskets

Delicate wash tray baskets are manufactured with stainless steel and silicone rests have been fitted into their base. Instruments sit in individual rests and are held in place with a firm clip protected with a silicone shield. Fine instruments are particularly protected during washing and sterilisation.

CODE	PRODUCT	DESCRIPTION	SIZE
RON005	Full tray	Can hold 20 instruments	285 x 185mm
RON006	Half tray	Can hold 9 instruments	142 x 185mm
RON007	Quarter tray	Can hold 5 instruments	71 x 185mm

Silicone inserts

Silicone inserts allow custom configuration within the tray to accept various sizes of instruments.

Plastic sterilisation trays

A range of trays designed to cover most requirements for protecting instruments during sterilisation and subsequent transportation. The trays exhibit grid holes to provide drainage, fixing positions for various inserts, and buttons to raise silicone pin mats from the base. Transparent lids are strongly fitted to provide additional security and ensure all contents are highly visible. Steam, ethylene oxide or formaldehyde sterilisation processes are all suitable.

Packing

pages 23-38

Our flexible production methods ensure the best sizes can be produced for our customers, even if these are not the wrap industry standard. All sizes can be manufactured smaller without sacrificing high performance or protection levels. Clinipak actively engages with customers to identify when sizes can be reduced, which results in cost savings, lower disposal costs and diminished waste.

Some of our most popular size options are in the table below, but please contact a member of our sales team for further size enquiries.

50 x 50cm	90 x 90cm	100 x 120cm	120 x 150cm	150 x 150cm
60 x 60cm	100 x 75cm	100 x 140cm	130 x 150cm	170 x 150cm
75 x 75cm	100 x 100cm	120 x 120cm	140 x 140 cm	180 x 150cm

Barrier wraps

A wide range of sterilisation wraps which provide a bacterial barrier and protect the contents of a set or pack from contamination. If classed as alcohol repellent, our barrier wraps can also be used within the sterile field.

All Clinipak barrier wraps conform to both ISO11607-1 and EN868-2.

Crepe and plain paper

A complete range of cellulose sterilisation wraps.

S EO G ~~2~~ CE LF Custom sizes available

- 60gsm
- ISO11607-1 and EN868-2 compliant
- Available in green or white

Clinipak 340 wrap

Clinipak 340 wrap is a high performance sterilisation material that is suitable for inner and outer wrapping of medium to large trays and packs. This material exhibits a synthetic reinforcement within the cellulose fibre structure, which improves strength and increases its softness.

S EO ~~2~~ CE LF Custom sizes available

- 60gsm
- ISO11607-1 and EN868-2 compliant
- Alcohol repellent
- Available in green and blue
- Also available for Gamma sterilisation

Our wrap range is designed to overcome many of the common challenges encountered when sterilising, storing and transporting wrapped packs, including rips, tearing, and wet packs.

Choice wrap

S EO HP 2 CE LF Custom sizes available

A fully synthetic SMS product which has been designed to offer total flexibility and enable users to pack conventionally or with 'two layers' at once. Clinipak choice wrap is not just exceptionally strong and very drapeable, but is available with alcohol repellence in both green and blue for use within the sterile field. The blue wrap can be supplied without alcohol repellency if required.

A 70gsm choice blue ultra edition of this product is also available to be used as an outer sterilisation wrap, given that its high strength provides effective protection against cuts and tears, particularly against heavy orthopaedic sets.

All choice wrap editions comply with the essential requirements stated within the Medical Devices Directive EC 93/42 - 2007/47/EC - Class 1 and are CE-marked on their product labels.

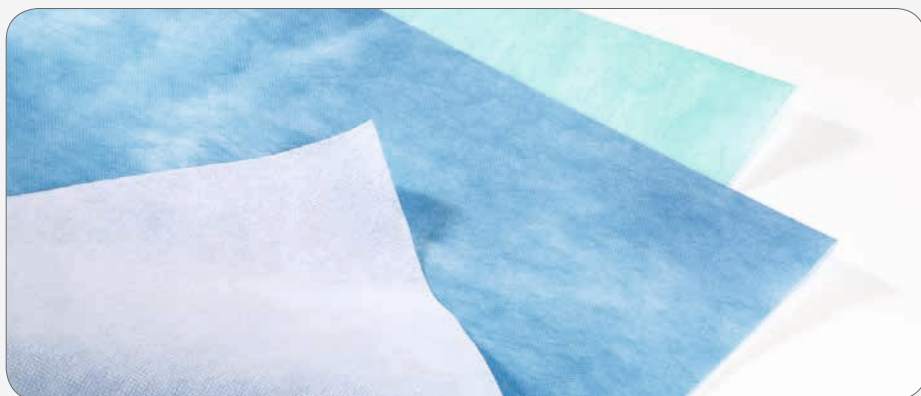

- 53 – 55gsm
- ISO11607-1 and EN868-2 compliant
- Available in green or blue
- Green wrap is alcohol repellent
- Blue wrap is available with OR without alcohol repellency
- Also suitable for Hydrogen Peroxide/Plasma sterilisation

Choice wrap dry

S EO 2 CE LF Custom sizes available

A patented tray wrap solution to eliminate or heavily reduce the occurrence of wet packs. Clinipak choice wrap dry differs from conventional wraps, given that the inner surface exhibits a high degree of absorbency and the outer surface repels both water and alcohol. The absorbent surface disperses the condensate within a typical steam sterilisation process and assists with evaporation during the vacuum cycle.

This wrap is manufactured with a blend of materials that are compliant with the recognised standards for toxicology, bacterial resistance and drape.

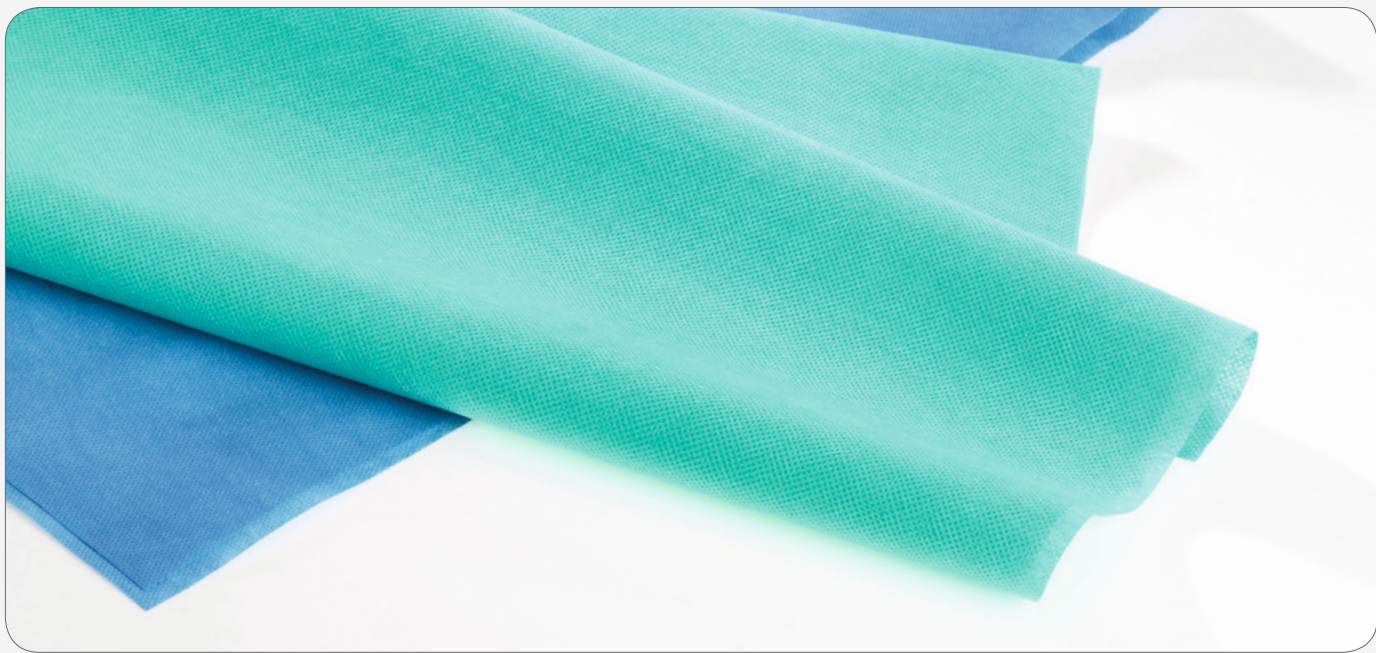

- 79gsm
- ISO11607-1 and EN868-2 compliant
- Alcohol repellent
- Available in green or blue

Choice together wrap

Choice Together is a two-sheet wrap system that comprises two colours of latex-free wrap joined together along the sides. Each sheet is a 5-layer nonwoven tray wrap, manufactured from spun-bonded and meltblown polypropylene, which provides a wet and dry microbiological barrier. The two-sheets of wrap being bonded together helps simplify the wrapping process whilst increasing durability to avoid rips, tears or punctures. Available in 3 different weights (43g Light, 50g Medium and 60g Heavy) and a range of sizes to meet all Sterilisation Service user requirements.

All choice together wrap editions comply with the essential requirements stated within the Medical Devices Directive EC 93/42 - 2007/47/EC - Class 1 and are CE-marked on their product labels.

- 43, 50 and 60gsm
- ISO11607-1 and EN868-2 compliant
- Intended for use as a wrap for trays & baskets
- Can be used as an interleave in combination with other Clinipak barrier wraps as well as with Clinipak non-barrier transportation wraps and plain and crepe papers
- Also suitable for Hydrogen Peroxide/ Plasma sterilisation

Wrap bags

Both barrier and transportation wraps are available in a 'pillowcase' format to facilitate the wrapping process. Simply fold and seal the bags with autoclave tape for a time-saving alternative. Custom sizes are available to suit distinct requirements.

Choice bags

An innovative solution that enables users to introduce a strong, autoclavable outer bag as a transportation bag or a second layer of sterilisation wrap. Manufactured from the same strong material as choice wrap, Clinipak choice bags provide an outer layer that is incredibly user-friendly. Wrapped trays can be easily inserted into the bag, closed and sealed with autoclave tape.

Transport wraps

Transportation wraps have been made to provide a strong dust cover and resist tearing. All Clinipak transportation wraps must be used in conjunction with one compliant barrier wrap to completely prevent the ingress of micro-organisms.

Use of a single barrier layer with transportation wrap can be a cost-effective solution which reduces damage in handling and transport. If adopted, changes to both wrapping and unwrapping procedures may be required to ensure aseptic opening.

Transportation cover wrap

S EO HP ~~2~~ CE LF Custom sizes available

The ultimate handling material used to combat damaged packs due to its strength and tear resistance. The range is not only convenient when handling heavy orthopaedic sets, but uses distinctive colours to easily distinguish them from barrier layers. All Clinipak transportation wraps can be supplied on their own, interleaved with any compliant barrier layer or introduced as a triple layer to guarantee a strong, high-quality and cost-effective wrap combination.

- 60gsm
- Must be used in combination with a compliant barrier layer
- The range of colours can be used to differentiate packs e.g. loan sets, offsite decontamination etc.
- Available in purple, orange, yellow and red
- Also suitable for Hydrogen Peroxide/Plasma sterilisation

Dry transportation cover wraps

S EO ~~2~~ CE LF Custom sizes available

Dry transportation cover wrap consists of purple transportation wrap with an additional, patented absorbent layer. This wrap provides optimum protection from dust, moisture and handling in addition to an absorbent inner layer to facilitate the dispersion of condensate during the autoclaving process.

- 75 and 83gsm
- Must be used in combination with the compliant barrier layer
- Can be used to identify specific packs
- Available in purple

Autoclave tapes

A wide range of unique, manufactured tapes which demonstrate excellent binding characteristics and comply with various types of sterilisation wraps.

Standard autoclave tapes

CODE	PRODUCT	DESCRIPTION	QUANTITY	SIZE	PROPERTIES
ST100.25NUFF	Steam autoclave tape with indicator	This has an effective indicator turning from white to dark brown/black when subject to the specified conditions.	36/ctn	25mm x 50m	 
ST130PL25	Plain steam autoclave tape	The same quality as the autoclave tape, but without an indicator. This tape is for closing purposes only.	36/ctn	25mm x 50m	 
ST101SMS19	SMS tape	A blue, steam autoclave tape which exhibits excellent adhesive properties for synthetic wraps etc.	48/ctn	19mm x 50m	 
ST.110ETO	Gas ethylene oxide tape	A tape that changes colour when exposed to ethylene oxide gas.	48/ctn	19mm x 50m

Steriking premium pouches & reels

Steriking pouches and reels possess a unique nine-layer film with seven polypropylene (PP) layers which guarantee high elasticity, strength and durability. All Steriking medical pouches also exhibit strong, factory-made seals which can withstand vigorous processing and handling. These pouches and reels are produced in line with clean-room condition requirements, use various medical grade films or breathable webs, and suit all common sterilisation methods.

The premium Steriking range supplied through Clinipak includes: flat pouches, flat reels, gusseted pouches, gusseted reels, and self-seal pouches. The Tyvek® variant of these pouches and reels is also available for plasma and gamma sterilisation. **Please contact a member of our sales team for further size enquiries.**

Sterilisation

pages 39-42

Cleaning and validation

Clinipak products for monitoring the performance of steam sterilisers and providing reliable means of validation.

Bowie & Dick packs

Bowie & Dick packs are single-use autoclave test packs to monitor the performance of steam sterilisers and provide a more reliable means of validation. This form of validation is fully compliant with European standard ISO 11140-4:2007. Easy to open and simple to implement. The test sheet **will not change** and consequently provides a safe and permanent record.

CODE	QUANTITY
STE-BD-CLIN	1 box à 50 test packs
STE001	20

Container padlocks

Clinipak container padlocks are designed with a colour indicator that changes from blue to brown to indicate that the specified container has been processed by steam sterilisation. All padlocks can be easily fixed and have built-in break points to encourage easy removal. This product is compliant with ISO 11140-1.

CODE	DESCRIPTION	QUANTITY
LOCK3030BLUE	A small pack of container padlocks with a colour indicator.	100
LOCK3030BLUE1000	A large pack of container padlocks with a colour indicator.	1000

WIPAK multi-seal test kit

The WIPAK multi-seal test kit includes weekly and daily testing measures to monitor sealing processes. The testing consists of seal seam integrity testing, ISO 11607-1:2006, Steriking® seal control sheets and seal leak detection with dye penetration ASTM F1929-12. This product enables users to test one sealing device for a one year period.

- 300 seal control test sheets
- 1 stopwatch
- 80ml dye solution (drop flacon and pipette)
- Instructions for use
- Weekly test reports
- Daily reports with sheets

Sterilisation containers

A range of containers which protect and maintain the sterility of expensive instruments. All sterilisation containers ensure a clear return on investment and are a 'greener' alternative to sterilisation wraps.

CBM Containers

CBM Containers are installed with permaside aluminium filters, used in steam sterilizers conforming to EN285, and fully compliant with EN969-8 and ISO11607-1. The body is produced with anodized aluminium for increased corrosion resistance, particularly against modern alkaline washing cycles. The container lid is manufactured from stainless steel for improved scratch resistance. CBM containers also employ permanent PTFE filter cartridges which are certified for more than 2000 cycles, giving them a general shelf life of 5 years.

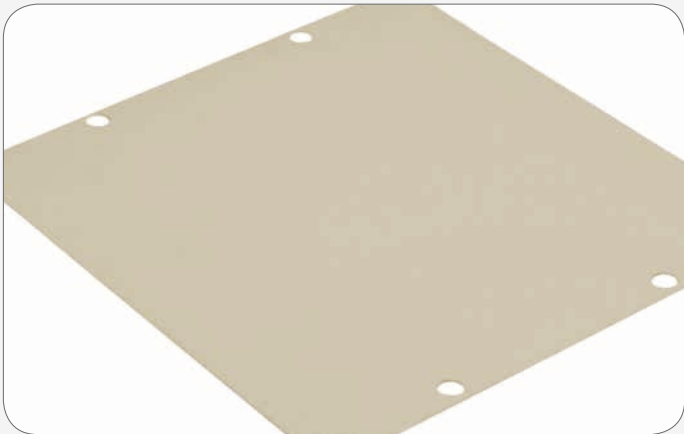

CODE	DESCRIPTION
CBM2070PS	600 x 300 x 260mm
CBM2071PS	600 x 300 x 210mm
CBM2072PS	600 x 300 x 160mm

CBM2079PS	600 x 300 x 135mm
CBM4072PS	460 x 300 x 160mm

CBM Container Filters

Clinipak distributes a specialised range of CBM container filters for steam sterilisation. In addition to single-use paper filters, CBM cotton filters and synthetic filters are available. The cotton filters can be implemented for over 70 cycles while the synthetic filters can be introduced for 200 cycles. **Please contact a member of our sales team for all size enquiries.**

polySteribox®

polySteribox® is a range of all-in-one, re-usable and hermetically-sealable sterilisation containers from Ritter Medical. The base demonstrates effective bacteria filters and the patented interlocking system prevents accidental opening. The containers effectively save space, can be easily stacked and are well-suited to both the storage and transportation of sterile goods. There are 2 forms of PTFE filter sets available: permanent/lifetime and annual.

Silicone mats and safety seals are also available exclusively for polySteribox®

CODE	DESCRIPTION

Transport

pages 43-48

Transportation boxes and crates

A selection of boxes and crates which ensure that cleaned or contaminated surgical instruments can be transported effectively. These solutions reduce damage to wrapped sets in handling and transport.

Transportation boxes (UN3291)

Clinipak transportation boxes are suitable for the transportation of Medical Waste N.O.S (Class 6.2, Classification code I3, UN3291) in accordance with Packing Instruction P621 defined in ANNEX A of the European Agreement concerning the International Carriage of Dangerous Goods by Road. These transportation boxes are also compliant with section 2.2.62.1.5.7 of the agreement and facilitate the transportation of all used medical instruments or equipment for the purposes of decontamination, cleaning, sterilisation or repair.

These transportation boxes are stackable, can be custom printed with text on the box and lid, and withstand washer disinfectors for decontamination purposes. Blue and red variants of these boxes are available to distinguish between 'clean' and 'dirty' contents. Optional metal inner baskets are available for box sizes 002, 003 and 004.

Amcor Pouches and Reels “ULTRA”®

2

ULTRA® is formed using one web of 90 gsm non-woven based material, with a partner web of specifically developed film laminate, giving optimum peelability characteristics. Closure can be achieved by use of sealers, both rotary and impulse, which are currently used in all processing units. The ULTRA® concept brings numerous advantages and improvements amongst which:

- Packing of theatre instrument trays and baskets can be achieved up to 4 times quicker than by using a standard double wrapping technique
- ULTRA® inherently reduces considerably the risks of bursting during the vacuum and pre-sterilisation phases of the steam sterilisation process (up to 6 times greater than conventional packing materials)
- Control and Effectiveness of the Microbial Barrier according to ISO 11607-2
- Guarantee of Aseptic Opening and Presentation at Point of Use
- The performance of the ULTRA® concept guarantees a longer shelf life compared to conventional packaging

Storage

pages 49-52

Storage Systems

A selection of products to support SSD units with the storage of sterile sets. This has been achieved by means of effective storage systems and transport trolleys.

Belintra UBeFlex storage system

The UBeFlex® modular storage system was developed with very quick assembly, functionality, durability and stability in mind. The result is a unique storage system made from anodised aluminium and other high-quality, anti-static synthetic materials, which means it can be used in both sterile and non-sterile environments.

Thanks to the modular construction, in D-type or W-type columns, which may or may not be combined with shelves, it can be used in various departments of the healthcare institution, from CSA through pharmacy to kitchen and cold storage. Because of the unique design, it is an ergonomic and hygienic storage solution and can also be used as a "pass-through" rack.

Please contact a member of our sales team for further product information.

Belintra Stainless Steel Trolley

Belintra stainless steel trolleys are resistant to washing tunnels, fitted with a lock with breakable seal, and produced in accordance with Euronorm standard 600 x 400 mm or DIN standard 600 x 300 mm. This Belintra transport trolley has been designed to transport stored sterile sets between external sterilisation units and hospitals (and also from hospitals to central decontamination units). These trolleys are also compatible with cart washers.

- 270°C swivel doors
- Removeable runners
- 125mm diameter wheels
- 160mm diameter castors

Belintra UBeFlex KD Transport Trolley

The Belintra Uflex KD Transport trolley is produced with anodised aluminium, equipped with nylon 'no-noise' runners and designed for the internal transport of sterile and non-sterile goods. A polypropylene cover can be introduced to facilitate the use of the trolley in sterile environments.

The trolley is easy to adapt, demonstrates highly durability and exhibits non-marking swivel wheels which are easily maneuvered and can be locked into place.

Transportation trays and bags

A range of products to ensure that all sterile sets can be further protected from dust and rigorous handling.

Belintra transportation trays

Stainless steel transport trays provide protection to packs during transportation.

CODE	SIZE
BELTRY010	600 x 400 x 100mm
BELTRY013	500 x 540 x 70mm

Clinipak transportation trays

LF

Clinipak transportation trays reduce the damage that wrapped packs can endure as a result of poor handling and shelving during the transport and storage stages of the decontamination process. This product is available in sealed-edge polypropylene (correx) or cardboard. Both variants can be used alone or with a strap and two transportation trays can be interlocked to form a lidded box.

The unique sealed polypropylene board in particular enables the trays to be processed through a decontamination wash cycle for repeated use.
